Projects

My Recipes App

Next.js • Clerk • Supabase • PostHog

my-recipe-app-taupe.vercel.app

2026

- Recipe library with folder organization, bulk actions, and image uploads; installable as a PWA with public demo mode
- Production-grade infrastructure: Clerk auth, Upstash Redis rate limiting, Sentry error monitoring, PostHog analytics

Habit Flow

React • TypeScript • PWA

habitflow-omega.vercel.app

2026

- Offline-first habit tracker and weekly planner — no backend, all data stored locally
- Track habits and tasks in one place, maintain streaks with a monthly grid view; installable on iOS and Android

Podcast Summarizer

Next.js • Supabase

2026

- Paste a YouTube podcast URL → AI generates a structured article with sections, quotes, and tags
- Next.js with Supabase for auth and storage; installable as a PWA
